PROFESSIONAL SUMMARY

Final-year Informatics Engineering student at Brawijaya University with hands-on experience in full-stack web development. Experienced in building production web applications using React, Next.js, Vue.js, Laravel, Astro, and Hono. Proven record of delivering web products serving up to 17,000+ users, leading front-end teams, and placing competitively in national-level hackathons.

TECHNICAL SKILLS

Frontend	React, Next.js, Nuxt.js, Vue.js, Astro, Tanstack Start, Expo
Backend	Laravel, Hono, REST API, MySQL, PostgreSQL, SQLite, Prisma, Supabase, Drizzle
Mobile	React Native (Expo)
Tools	Git, GitHub, Agile/Scrum, VS Code, Figma
Languages	Indonesia (Native), English (Professional Working Proficiency)

EXPERIENCE

PT Cubiconia Kanaya Pratama

Mar 2026 – Present

Fullstack Developer Intern

- Shipped and maintained scalable web applications ensuring high performance and reliability across multiple devices and environments.
- Built full-stack features including REST API integration, database operations, and responsive user interfaces.
- Improved application performance and stabilized production environments serving active users.

PT Rahasia Esa Dunia (Sequrra)

Feb 2026 – Present

Front-End Developer Intern

- Built responsive UIs for web applications supporting product authentication and verification systems.
- Wired front-end components to back-end APIs, ensuring seamless data flow and secure application functionality.
- Shipped scalable, user-friendly web experiences in close collaboration with designers and back-end engineers.

TEDx Universitas Brawijaya

Mar 2026 – May 2026

Software Engineer

- Built an animation-heavy event website using React and Astro, with a focus on performance optimization and smooth user interactions.
- Shipped backend business logic and API endpoints using Hono under strict production deadlines.

- Delivered complex, performant animations for a large-scale public event reaching thousands of attendees.

RAJA Brawijaya 2025

Apr 2025 – Aug 2025

Front-End Developer

- Maintained and scaled a production web application serving 17,000+ active users, ensuring performance stability and a responsive UI across all devices.
- Led front-end development efforts, aligning technical execution with design vision throughout the event lifecycle.

Intrivia 2025

Apr 2025 – Oct 2025

Front-End Lead · Vice Head of IT Department

- Owned a web service with 600+ registered users as both Front-End Lead and Vice Head of IT Department.
- Steered front-end development to align with event timelines and design vision.
- Led a team of developers — assigning tasks, unblocking issues, and ensuring timely delivery of key milestones.

Brawijaya Appreciate (Braciate) 2024

Jul 2024 – Nov 2024

Software Lead · Vice Head of IT Department

- Led the technology team as Tech Lead and Vice Head of IT Department for Braciate 2024.
- Shipped the front-end infrastructure end-to-end, including vote and assignment features serving 1,200+ users.

Basic Computing Community (BCC)

Mar 2025 – Present

Front-End Developer

- Delivered interactive and responsive web interfaces using modern front-end frameworks.
- Sharpened engineering practices through internal code reviews and knowledge-sharing sessions.

POROS Brawijaya University

Mar 2024 – Jan 2025

Front-End Developer

- Applied front-end best practices to improve user experience, performance, and code maintainability.
- Maintained and extended front-end components for internal projects in close coordination with the team.

PROJECTS

Robot BRONE Project

Sep 2025 – Nov 2025

Front-End Developer | React, REST API, State Management

- Built and managed web services integrating REST APIs with state management for real-time data consistency across the application.
- Optimized performance and accessibility — cut page load time and ensured an inclusive experience for all users.

BCC Software-House Website

Mar 2025 – Oct 2025

Front-End Developer | React, REST API, Agile

- Wired front-end components to back-end APIs to enable dynamic content rendering at scale.
- Contributed to agile sprints through regular stand-ups, code reviews, and issue tracking.

EDUCATION

Brawijaya University — Malang, East Java

Aug 2023 – Present

Bachelor's Degree in Informatics Engineering (Final Year)

COMPETITIONS & AWARDS

IFEST 2025, Padjajaran University

2025

Top 5 — Hackathon Category

- Developed an innovative technology-based solution in a competitive hackathon environment, demonstrating strong problem-solving, product development, and rapid prototyping skills.

Kemdikbudristek

2023

3rd Place — OSN-K Informatics

- Placed 3rd in the national Olympiad in Informatics qualification round (OSN-K), applying C++, Mathematics, and algorithmic problem-solving under formal competitive conditions.
